No Accidents!

OTHER NOTABLE FEATURES AND OPTIONS YOU SHOULD KNOW ABOUT:

Safety and Security

- Pedestrian impact prevention - An extra step toward safety. Pedestrians don't always stop, look, and listen,

but with Pedestrian Impact Prevention, your vehicle is equipped to better see them and avoid them. This system constantly monitors the road ahead to identify and track pedestrians. It projects that image to an interior display screen, AND should an impact become likely, Pedestrian impact prevention takes steps to avoid a collision.

- Forward collision mitigation - Forward thinking. You look away for just a second and suddenly the vehicle in front of you has stopped. That's when the forward collision mitigation system comes to life. When it senses an impending impact, it will activate a combination of features to help prevent or reduce the severity of an accident. Forward collision mitigation is always looking ahead.
- Rear camera - Watching your back! The rear camera helps you see obstacles and hazards you otherwise couldn't by showing enhanced images of what is behind you. The rear camera is an extra set of eyes that's both convenient and safe.
- Rear collision mitigation - It has your back. Rear collision mitigation uses sensors to monitor the area behind you. If it senses an impending crash, it activates certain features to help prevent a collision or reduce the severity of it. Put your worries behind you with rear collision mitigation.

Technology and Telematics

- Smart device mirroring - Smartphone, meet smart car. You can control your device through your vehicle's infotainment system. Smart device mirroring brings together safety and convenience by making it easier to find what you're looking for while keeping your eyes on the road.
